

Table of Contents

| | |
|---|-----|
| Preface | iii |
| Summary | 1 |
| LUTRAQ and Volume 5: Analysis of Alternatives | 1 |
| Key Conclusions | 1 |
| Chapter 1: Description of Alternatives | 5 |
| Chapter 2: Transportation, Air Quality, Greenhouse Gas & Energy Analyses | 13 |
| Auto Ownership | 13 |
| Mode Choice | 14 |
| Vehicle Trips Per Household | 20 |
| Vehicle Hours of Delay | 21 |
| Peak Vehicle Hours of Travel and Daily Miles of Travel | 23 |
| Air Quality - Carbon Monoxide and Ozone Precursors | 24 |
| Green House Gases and Energy Consumption | 25 |
| Conclusion | 26 |
| Appendix A: An Overview of the Modeling Process | A-1 |
| Travel Demand Modeling | A-1 |
| Air Quality Modeling | A-2 |
| Greenhouse Gas and Energy Consumption Modeling | A-2 |
| How Key Concepts In The LUTRAQ Alternative Were Included in the Modeling Process | A-3 |
| Pricing | A-4 |
| Appendix B: Integrated Land Use and Transportation Models | B-1 |
| Update on the State of the Practice | B-1 |
| Portland Modeling | B-3 |
| Other Studies | B-4 |
| Appendix C: Adjustments to Model Outputs for Walk/Bike Trips | C-1 |
| Under-Reporting of Walk/Bike Trips in the Portland Travel Survey | C-1 |
| Underestimation of Walk/Bike Trips in the Portland Model | C-4 |
| Adjustments to Mode Outputs for Walk/Bike Trips | C-4 |
| Appendix D: Acknowledgments | D-1 |
