About the Authors of This Volume

Cambridge Systematics, Inc.

Cambridge Systematics provides planning and management services in the areas of transportation management information systems, economic development, energy and telecommunications. Since its formation in 1972, the firm has gained a national reputation for applying state-of-the-art analytic techniques to complex problems, and developing innovative, practical solutions for clients.

Thomas Rossi, from the Cambridge Systematics staff, contributed to the production of this volume.

Parsons Brinckerhoff Quade & Douglas

Parsons, Brinckerhoff, Quade & Douglas is the leading provider of transit planning and design services in the United States. The firm has been involved in more than 75 percent of the nation's light rail transit systems in operation or under construction today. The firm's architects have developed concepts for or designed over 200 transit stations in the last ten years.

Samuel Seskin, Lead Planner for the firm's Portland, Oregon office, is the overall technical manager for the LUTRAQ project team. Dr. Judy Davis and Stamatia Petsios also contributed to this volume.
